

# Service Description

Cyber Insurance

"Female wrens leave the nest before dawn heading straight to males singing the dawn chorus. In breeding couples over 10% of chicks born were from different males."

**What gets you up in the morning?**

This service assesses an organization's financial insurance and incident response capability. Our team can provide insurance quotations or act as an advisor during the selection of new policies or assess existing coverage.

The assessment can be integrated with our predator-prey platform and the resultant dashboard succinctly identifies an organization's high-risk behavior. Platform outputs can be used to influence and inform Enterprise Risk Management, Budget and Strategy.

## Insurance

We use artificial intelligence to assess new and existing policies against a wide range of public and private information to identify high risk behavior.

## Financial

Do you have sufficient coverage for data breach expenses? Are you aware of the types of costs associated with a major breach? Do you have a financial response and emergency funding plan? Do you understand your obligations and strategies for chains of evidence and claims management? These are just some of the questions our assessment answers.

## Incident Response

Do you have an incident response team available 24-7? Are your team well versed in major breach response? Do you have operational and executive incident management plans? Do you have a media communications strategy? Are your business partners in-tune with your response plans? Our assessment answers those and many more questions.

## Insurance

The assessment is available as a customized offering and we will acknowledge the expected delivery date during quotation.

Identifying an organization's high-risk behavior in its insurance capability is a key element to understanding risk.

Features	Custom
Financial	✓
Incident Response	✓
Behavioral Analytics	✓
Behavioral Recommendations	✓

Each assessment includes a summary rating within the scale of 1 to 5 and a red-amber-green dashboard display.
